Your grade: 100%

Your latest: 100% • Your highest: 100%

To pass you need at least 50%. We keep your highest score.

Next item →

1. (True/False) Any linear model can be turned into a non-linear model by applying a kernel to the model

1/1 point

Correct! You can find more information in the *SVM Gaussian Kernels* lessons.

- False
- 2. (True/False) SVMs with kernels are recommended for large data sets with many features

1/1 point

- True
- False

Correct! You can find more information in the SVM Gaussian Kernels lessons.
