---

1. (True/False) The Sum of Squared Errors (SSE) can be used to select the best-fitting regression model.   **1 / 1 point**

    🔘 True

    > Correct! You can find more information in the *Introduction to Linear Regression (Part 2)* lesson.

    ⚪ False

---

2. (True/False) The R-squared value from estimating a linear regression model will almost always increase if more features are added.   **1 / 1 point**

    🔘 True

    > Correct! You can find more information in the *Introduction to Linear Regression (Part2)* lesson.

    ⚪ False

---

3. (True/False) The Total Sum of Squares (TSS) can be used to select the best-fitting regression model.   **1 / 1 point**

    ⚪ True

    🔘 False
